SOME TIPS TO KEEP CHILDREN SAFE AND SECURE

As a tenant, it is imperative that you are living in a safe environment and that you are protected at all times.

If you live in a property with windows or a balcony above ground floor, it is important that the areas are safe and secure for children.

In regard to fall prevention, here are some simple tips to make your experience as a tenant super safe:

Have window latches and locks fitted to stop windows opening more than 12.5cm when children are present

Beds, pot plants and other light furniture which can be used for climbing should be kept away from windows and balconies

You should not rely on flyscreens to prevent a child falling out of a window

Children should always be supervised near windows and balconies and be taught to play away from them

Keep doors leading to balconies closed to prevent children's access to them

When it comes to windows, it's always a good idea to make sure the window locks are working correctly. Some things to look out for include:

- Faulty locks
- Accidentally damaged devices
- Accidental removal of the device
- General overuse or accidental misuse
- Lost keys

The number of accidents from high risk windows has reduced significantly since legislation came into place, and we want to make sure this number keeps dropping.

Please ensure you contact your Property Manager immediately if you have identified any issues with your windows.
